

## **Friendship The concept of "friendship" is not universal in different societies and cultures it put its meaning**

Friendship The concept of friendship is not universal in different societies and cultures put in it its meaning. Everyone will agree with the wording according to which each is a person who is not your enemy or the enemy of your enemy. But beyond this definition to the contrary friendship covers a broad range of human relations. In some countries, the word friend is used very loosely. There is another person sitting opposite in a cafe colleague while in another country these people would be called just acquaintances. The concept of friendship is so vague in English for example the words boyfriend and girlfriend can imply a relationship that is friendship really was not. In Russia under the influence of rather cultural norms and not by political and social systems to friendship very seriously friends have strong ties are more important than any other including family. You can marry several times during my life, but a friend is forever. In modern English there is no difference between you and you. In German French Russian and many other languages has a good shape, you which is used to refer to equal or superior to man and is an indicator of formal relations and the familiar you is reserved for friends and family members. For example you vous and tu in French you you sie and du in German you and you and you in Russian. The transition from you to you means changing the relationship from a formal to a close. In many European countries people celebrate this transition from official communication to intimate a special ceremony, recorded in the national tradition. This can be treated seriously or take it as a joke but in any case, the beginning of a more trusting emotional relationships between people is considered an event. Linguistic differences highlight the fact that the concept of friendship goes far beyond the words which may mean anything more than pleasant company or proximity of interests. Friendship is a deep and sincere relationship which includes a whole variety of emotional tones and overtones. In addition to the ambiguity associated with the cultural traditions of the various interpretations of the concept of friendship also reflect the personality of the person, his capacity for friendship and life experience. In any culture there are some poor people who have no clue what the word friend if you don't count subtracts its definition in the dictionary. They have never experienced deep feelings of friendship therefore are not even aware what are they missing in my life. In some cases, the only other person becomes the dog of course is not a person but at least between the dog and the owner there is a mutual
